

About UHK

The University of Hradec Králové is a young, well-established, public institution founded in 1959. UHK offers studies in bachelor, master, and doctoral degree programmes taught in Czech or English.

The rich spectrum of educational activities includes economy, management and computer science; humanities and social sciences; educational and artistic disciplines; also, natural science and technology programmes.

The UHK prepares students with an emphasis on their future successful professional life. Statistics show that most graduates are successful in finding a job soon after graduation.

The university has modern facilities and infrastructure. The campus is conveniently located close to the historical city centre of Hradec Králové and is easily accessible for pedestrians, cyclists and drivers alike. The university offers accommodation to all international students in fully equipped dormitories.

UHK faculties

Faculty of Education

The mission of the biggest and founding faculty of the university with more than 50 years of history is to provide high-quality education in accredited teacher-oriented and non-teacher oriented programmes. The faculty offers a wide choice of study programmes in English for students paying tuition fees, and courses in English/French/Russian. Teaching practice programmes are available.

Faculty of Informatics and Management

Academics at the faculty are known for their very friendly and individual approach thanks to the wide variety of study programmes, its alumni can easily find a job in several different fields. The faculty cooperates with companies such as IBM Czech Republic, Quadient Technologies Czech, Unicorn, Microsoft and VMware. The faculty focuses mainly on intelligent decision support systems, smart solutions in the computer environment, cognitive processes and their ICT support.

Philosophical Faculty

The faculty provides education in the fields of archaeology, archival science, history, philosophy, political science, social work, and several interdisciplinary study fields. This faculty is a meeting point for students coming from all around the world and offers many courses in English within social science and humanities.

Faculty of Science

The faculty was established in 2010, consisting of five departments – Biology, Physics, Chemistry, Cybernetics and Mathematics. The faculty is constantly moving forward – just as nature and society are. It has a nice family-like atmosphere and students can easily combine multiple study programmes which help students to become intensively involved in research while studying. The faculty also organizes several summer schools.

About Hradec Králové

The city of Hradec Králové is a lively student city with unique architecture, original theatres, beautiful parks, reliable public transport, perfect conditions for almost every kind of sport, and many festivals going on throughout the year.

The town has been evaluated as the best place to live in Czechia in recent years. It is situated only 100 km from Prague allowing comfortable travelling around Central Europe.
